## **DETAILED ACTION**

### ***Reasons For Allowance***

1. Claims 23-44 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 23 and 33, Soliman (U.S PAT. 5,675,581) teaches a method for testing at least one antenna using a receiver module and a coupling module, the coupling module is arranged between the at least one antenna and the receiver module, in which the antenna and the receiver module are supplied by the coupling module with a noise signal from at least one noise signal source (see fig. 5 col. 13 lines 52-65). However, Soliman fails to teach or fairly suggest the method for testing at least one antenna using a receiver module and a coupling module comprising the acts of: determining an instantaneous transmission coefficient which indicates the ratio between a first and second noise signal, the first noise signal is passed to the test module via a first path without passing through the at least one antenna, and the second noise signal is passed to the test module from the noise source via a second path which passes via the at least one antenna; and comparing the instantaneous transmission coefficient with a reference transmission coefficient, which is stored in a transmission matrix, by a test

module, in combination with other limitations, as specified in the independent claims 23 and 33, and further limitations of their respective dependent claims 24-32, and 34-44.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
